MAGLIFT - Ficha técnica

Description

MAGLIFT ha sido particularmente proyectado para las operaciones realizadas con las carretillas elevadoras que se usan en las operaciones industriales y en la logística. Este neumático sólido se caracteriza por una elevada capacidad de carga, así como por su excepcional confort. MAGLIFT ofrece una extraordinaria resistencia a cualquier tipo de corte, que se traduce en un ciclo de vida más prolongado para este neumático. La estructura reforzada reduce el riesgo de derrape, mientras que la forma especial del talón facilita su montaje en la llanta.
