

FL 635 - Ficha técnica

Description

FL 635 es un neumático radial de flotación idóneo para utilizarlo por carretera y en el campo. El particular dibujo de bloques de la banda de rodadura ha sido desarrollado para aplicaciones de prensas para empacar la paja. Gracias a la huella que proporciona una óptima distribución de la presión en el terreno, el neumático FL 635 reduce netamente la compactación del suelo, preservando el valor de los cultivos. El neumático asegura optimas propiedades de auto-limpieza, durabilidad y tracción además de excelentes prestaciones de velocidad.
