

MAGLIFT ECO RIB - Ficha técnica

Description

MAGLIFT ECO RIB ha sido particularmente desarrollado para los remolques de equipos de apoyo en tierra. Su estructura reforzada elimina el riesgo de derrape, mientras que el especial borde de protección de la llanta protege el neumático contra daños. MAGLIFT ECO RIB ofrece un excelente control de la dirección, una elevada estabilidad, pocas vibraciones así como l'auto-alineación de remolque. Otras ventajas son la baja resistencia a la rodadura y una reducida generación de calor con una consecuente eficiencia mejorada.
