

MAGLIFT GROSS - Ficha técnica

Description

El nuevo MAGLIFT GROSS se ha diseñado especialmente para tractores de obras y movimientos de semirremolques en aplicaciones industriales, principalmente en centros de distribución, centros logísticos y depósitos de contenedores. Su amplio perfil de la banda de rodadura proporciona una gran estabilidad lateral y una mayor seguridad en las operaciones de elevación y viraje, incluso con cargas pesadas. MAGLIFT GROSS se ha desarrollado con una estructura reforzada que elimina los riesgos de derrape, mientras que su forma especial del talón simplifica las operaciones de montaje sobre la llanta.
