

## MAGLIFT PREMIUM - Especificaciones técnicas

### Description

MAGLIFT PREMIUM es un neumático sólido particularmente desarrollado para operaciones de servicio pesado con carretillas elevadoras en el puerto, la minería o los astilleros de desguace. La banda de rodadura extra profunda (25% más en comparación con la versión estándar) con su diseño agresivo y robusto ofrece una excepcional tracción anterior y lateral así como un excelente control de la dirección. La mezcla especial de la banda de rodadura se traduce en una extraordinaria resistencia a los cortes y las laceraciones, prolongando la vida de lo neumático. Otras ventajas son la baja resistencia a la rodadura y una marcha suave.
