

## SR 713 - Especificaciones técnicas

### Description

SR 713 es un neumático radial **All Steel** con tecnología VF para maquinaria agrícola. Este neumático se caracteriza por una robusta carcasa con cinturones de acero multicapa y por una banda de rodadura con un dibujo de ranuras múltiples que garantizan una baja resistencia al rodamiento, además del desgaste uniforme de la banda de rodadura. Gracias a una huella más ancha, este neumático VF asegura una reducida compactación del suelo. SR 713 se distingue tanto en términos de prestaciones como por su fiabilidad, ofreciendo óptimos niveles de velocidad incluso por carretera.
