# MAGLIFT SMOOTH - Technical Specifications

Description

MAGLIFT SMOOTH has been particularly designed for ground support equipment (GSE), port and industrial trailers operating on smooth surfaces. The tire is made of a special tread compound, which ensures excellent cut and chip resistance and a long tire life. The smooth tread design and its maximum contact area provide extraordinary stability and optimized load distribution even under heavy-duty service conditions. MAGLIFT SMOOTH stands for excellent traction as well as low rolling resistance and low heat built up for improved efficiency. In addition, the specifically designed rim guard ensures protection against wheel damage, whilst the reinforced bead structure ensures best grip and eliminates any slippage risk during operations.

Version	STANDARD
Type	
Tyre Size	12.00 - 20

Dimensions US Standard

Usa code	94071234
Overall Width (inch)	10.6
Overall Diameter (inch)	42.8
Rim Rec	8.00 - 20

Load capacity (lbs)

mph / psi	-
15 LOAD WHEEL	16665
15 STEER WHEEL	13890
5 OTHER VEHICLES	15135

Rolling Circumference & SLR values are at rated Load and inflation pressure. These values may vary at different Load and pressure condition.
