

AW-18 - Scheda tecnica

Description

AW-18 è stato pensato per rimorchi e attrezzi agricoli impiegati nelle operazioni per la lavorazione del terreno. Il suo particolare design costituito da ramponi non direzionali e una spalla arrotondata, permette un minor danneggiamento delle colture nelle diverse manovre. Il disegno del battistrada è stato specificatamente studiato per garantire ottime qualità di autopulitura. AW-18 assicura inoltre un ottimo comfort di guida e una riduzione del consumo di carburante.
