

AW-18 - Especificações técnicas

Description

AW-18 foi concebido para reboques e máquinas com alfaías utilizados em operações de lavoura. O seu design especial, com saliências não direcionais e arredondamento da área do ombro, previne danos nas colheitas durante as manobras. O padrão do piso também foi especificamente concebido para maximizar as propriedades de autolimpeza. Além disso, AW-18 proporciona um excelente conforto durante a condução e reduz o consumo de combustível.
